| Members of crews of outgoing vessels inspected..... | 841 |
| Passengers of outgoing vessels inspected.....       | 548 |

On the American steamship *Olivette*, sailing May 22 for Key West and Tampa, a leper was found among the passengers and sent ashore. In the lazarettoes of Cuba there are at present 299 lepers, representing but a portion of the cases actually existing. For the first ten-day period of May 13 cases of leprosy were reported in the Republic of Cuba.

Since the beginning of the rainy season mosquitoes have become more numerous in Habana, belonging almost exclusively to the species *Culex sollicitans*.

*Report from Matanzas—Inspection of vessels.*

Acting Assistant Surgeon Nuñez reports, May 24:

Week ended May 20. Nine bills of health were granted to vessels clearing for the United States with an aggregate number of 271 members of crews and no passengers. There were no vessels fumigated. No quarantinable diseases have been reported within this district.

*Report from Santiago—Inspection of vessels—Leprosy still present.*

Acting Assistant Surgeon Wilson reports, May 19:

Week ended May 15. Bills of health issued to 7 vessels bound for the United States and its dependencies. No vessel fumigated. No new quarantinable disease has been reported. Three cases of leprosy are under treatment.

## GERMAN EAST AFRICA.

*Plague in district of Muanza.*

The following information is taken from the Veröffentlichungen des Kaiserlichen Gesundheitsamtes, Berlin, May 5:

Sixty plague deaths are reported, under date of April 14, in the district of Muanza.
